SMALL BUILDING LIFE SAFETY SOLUTIONS

Genesis signals are supported by a full range of accessories and options...

Genesis models with FIRE markings are available for applications where there is no substitute for the printed word.

Genesis trim plates cover oversized wall openings and come with or without FIRE markings. They're ideal for retrofits!

Snap-on and 1-gang signal masters provide precision strobe synchronization and independent horn control over two wires.

Coming soon...

The new ceiling horns and strobes offer the same good looks and performance benefits as their wall-mount counterparts.

Multi-candela models achieve unparalleled application flexibility without sacrificing cost or performance benefits.

Good looks and small size aren't the only appeal of Genesis signals. These horns and strobes also outperform comparable devices, hands down.

The age of bulky, protruding specular reflectors is at last drawing to a close thanks to Genesis, a remarkable line of signals from EST. Not much bigger than a deck of playing cards, Genesis strobes and horn-strobes put emergency signals in a whole new light. In fact, the unique design of Genesis strobes controls and conditions light so precisely that the output from these signals is simply unrivalled. To accomplish this, EST has re-invented the visual signal – from the ground up. The result is a powerful range of features and cost-saving advantages all rolled into a sleek, attractive design.

Available in an eye-soothing neutral shade of white or traditional fire alarm red, this line of strobes actually complements the décor without intruding upon it. Even the Genesis "running man" symbol was painstakingly designed to get the message across at first glance without the need to emblazon the word "FIRE" on the walls and ceilings of interior spaces. Not only does this treatment meet codes and standards requirements, it also overcomes language barriers and eliminates lens marking headaches.

Genesis: Emergency signals in a whole new light.

For details concerning Genesis horns and strobes, and how they will work for your small building applications, please see catalog sheet 85001-0529.
